### *The Fresno*

HERE is a captivating ranch-type home with an attached garage and a full basement. Five lovely rooms make thrifty use of every inch of floor space of this attractive and distinctive design. An open fireplace adds to its cheerfulness and the L shaped living and

dining room gives it individuality not found in every home. The landscape window at the rear of the living room, the quiet and secluded sleeping rooms and the spacious closets are special features of this design.

Classification 567-079  
 Basement Volume 9,000 Ft.  
 Main Volume 12,000 Ft.

SIX ROOMS AND GARAGE

25,400 CUBIC FEET

## *The Englewood*

THE breezeway porch with attached garage, a popular feature today, has completely modernized this traditional Cape Cod Colonial. Every convenience for the housewife has been kept in mind by the designer. The downstairs lavatory just inside the back entry is very handy for the youngsters and saves much stair climbing.

Notice that the long living room has three exposures and a fireplace, which adds so much to family enjoyment. Good sized bedrooms upstairs, ample closet space, conveniently located bathroom, are features which will charm the home builder who wants as many conveniences as possible for minimum outlay.

## WHY YOU SHOULD BUILD NOW!

Home ownership has always been the best investment for the average family. At the end of a given period of time, it is possible to have a clear title to a piece of property which will always have a market value. Because of the fact that building costs are steadily moving upward, there is no better time to build than the present.

The first step in the ownership of a home, after the lot has been decided upon, is the selection of a good plan. You will find many attractive and economical homes in this book that will fit your needs and requirements. It is important that your home should have (1) beauty of design (2) good room arrangement (3) economy of space and (4) low cost of upkeep.

In conformance with present demands of prospective home builders, as ascertained in national surveys, many of the homes in this book show the modern improvements that are demanded. The fundamentals of good design and planning have not been overlooked.

The amount of money available and construction costs will largely determine the size of the home and the number of new conveniences that may be included in the plan. Information on financing and home building costs can be secured from us, your lumber dealer. Remember, it is better to pay on a home of your own than to pay rent.

### A WORD ABOUT "G. I." LOANS

The Servicemen's Readjustment Act (commonly called the "G.I." Bill of Rights) includes provisions for the most extensive home procurement program on record. It gives the serviceman the most economical home financing plan ever offered anyone. Servicemen are urged to contact their local dealer, lending agency or the nearest office of the Veteran's Administration for complete details.

### APPROXIMATE COSTS

The price of a house varies in different parts of the country, depending on local conditions and the kind of materials used.

Every home in this book has a "Classification Number" from which the approximate cost of that home, exclusive of the lot and the garage (if detached) can be determined, as:

Classification 161-171

To arrive at the total construction cost, drop the first and last numbers. You then have 6117 which is the list price of that home in dollars. Your Lumber Dealer can give you the percentage to add to this list price for this community, as well as other valuable cost information.

# FINANCING YOUR HOME

How should you go about financing your home? In the first place, you should know what price you can afford to pay for a home and how much you can comfortably pay each month in paying for it. The most advantageous plan for home financing provides for monthly payments on principal and interest over a given period of time, from 10 to 25 years. This is a painless, sensible way to pay for a home in easy installments just like rent, and in some cases actually cheaper than rent.

The following charts have been designed to eliminate the necessity of calculations in determining the equal monthly payment necessary to pay off a loan of a given size. The interest rate in Table A is 4%, the interest rate in Table B is 4½%, the interest rate in Table C is 5% and the interest rate in Table D is 5½%, and for terms from 10 to 25 years. The payment shown in the table is the minimum uniform payment necessary to pay off the loan completely within the stipulated time.
